

# IMPC Technical Visit to Stone Three

**Date: 23 October 2026**

Stone Three, located at 24 Gardner Williams Ave, Paardevlei, Somerset West, is an industrial IoT and AI company specializing in advanced machine vision, mineral processing optimization, and data intelligence solutions. Founded in 2000, they provide smart sensors, remote process monitoring, and advanced process control to industries like minerals processing.

Key Aspects of StoneThree (Somerset West):

- **Smart Sensors and Optimizations:**

Develops AI-driven sensors and advanced process control (APC) for minerals processing (comminution and flotation) to boost recovery and throughput.

- **SmartROC™**

A globally connected hub where AI, machine learning, and deep mining expertise converge, delivering realtime diagnostics, remote process monitoring, and actionable insights that keep your operations running smarter, faster, and more profitable.

- **Stone Three Intelligence:**

An industrial AI solution that centralises live plant data and deploys specialised AI algorithms to continuously monitor performance, identify deviations, and turn complex data into confident, real-time decisions.
